Safety Needles

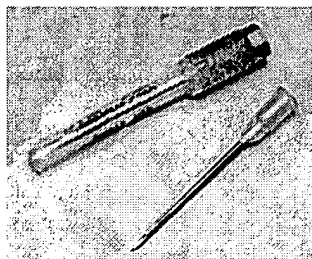

The Hypodermic Needle-Pro® needle protection device is a sterile unit that combines a hypodermic needle with a needle protection device. This device is ideal for all intramuscular and subcutaneous injections. The needle hub is color-coded indicating the needle size. It is available in 13 sizes, ranging from 18g x 1-1/2" to 25g x 5/8". With the Hypodermic Needle-Pro® device, the exposed needle can be secured in the protective sheath at the bedside after the injection has been completed, reducing the incidence of needlestick injury that may occur when disposing of the contaminated needle.

Hypodermic Needle-Pro® come 100 / box for a discounted price of \$32.00

Blood Collection Needles Blood Collection

Greiner® sterile, disposable, double-end needles may be affixed to a holder with minimal danger of contamination. Multiple sample needles feature a rubber sleeve which covers the opening on the stopper-puncturing end of the needle and stops the flow of blood as evacuated tube is removed.

Blood Collection Needles come 1000 / case for a discounted price of \$75.00

Hypodermic Needles

Greiner® Hypodermic Needles With Polypropylene Hub in all sizes, with thin wall. Regular A needles tri-beveled, single use Sterile, ultra-sharp, anti-coring, autoclavable needles are treated with special lubricant.

Hypodermic Needles come 1000 / case for a discounted price of \$55.00
